RUSTED STRAW FOR FEEDING

# LESSON FOR OCTOBER 29

The grain may be feel on the floor of the pen in thoughts or kept before the hirds in buggers. It is not any static considered advisable to feed the grain on the greand especially on heavy soil others it may get wet and maker. Unless the floor is kept deam it is bester to feed the grain in trouches than on the floor. The trouches shound to make so that the pigeone will not reside to thou and soil the feed with their droppings.

Hoppers are used with good success.

The second control of the more of the first properties of the second control of the more of the first properties of the first
